

## Rules for Challenge Day

- SAFETY is our number one concern.
- ALL motion must be controlled using fluid power.
- Use your materials wisely. Only limited numbers of components are provided for exploration and building a prototype, and at the Challenge.
- Only use the tools provided in your kit.
- Document everything in your portfolio.  
(Remember to bring two copies of your portfolio to the Challenge)
- On Challenge Day all materials will be provided except for tools. Remember to bring *only* the tools provided on the Workshop Day to the Challenge Day.
- Use your time wisely – time will be allowed for testing of your device on the Challenge Day.
- Teachers will draw numbers at registration on Challenge Day to determine order of teams for competition.
- Teachers, adults and volunteers are there to observe the students, not design, document or build prototypes or finalized design.
- **HAVE FUN!!**
