

NFPA Supplier Membership

Examples of subcomponents, materials, and products that enhance the performance of fluid power systems include, but are not limited to, the following:

Adhesives

Bearings

Bar stock

Castings

Caps/plugs

Clamps

Clutches

Compressors

Electric motors

Filter media

Flanges

Fluids and fluid additives

Gearboxes, gear reducers

Gears

Heat exchangers

Lubricants

Machined parts

Materials (steel, metal, copper, aluminum block/bar etc...)

Shafts and shaft couplings

Solenoids

Spools for valves

Springs

Switches

Tubing for cylinders (tubing for conveyance is a manufacturer product)
