

NFPA invites you to a special recruitment event on February 10th in partnership with Northern Illinois University (NIU), a valued Power Partner University. NIU offers fluid power education through dedicated courses and actively participates in the Fluid Power Vehicle Challenge and the Fluid Power Club program.

The event will begin with a career fair where NFPA member companies can connect with engineering students from NIU. Following the career fair, we will host a luncheon and series of presentations from NIU faculty and NFPA. We will wrap up our event with a roundtable discussion where representatives from each NFPA member company in attendance can collaborate to answer student questions about fluid power and industry trends.

February 10, 2025

*NIU Rock Valley College, Rockford, IL | 9:30am - 1:30pm CT*
