Do you require IFPS certification?

No

Do you offer internships?

Yes

What technology or markets do you focus on?

HAWE Hydraulik offers extremely robust hydraulic solutions which are energy-efficient and compact. Our technology can be used universally thanks to electronic control, modern interfaces, and flexibility in terms of flow and pressure range. We manufacture the highest quality hydraulic components, constructed to minimize space and maximize product durability for the mobile, industrial, and oilfield markets.

Describe your company culture

In 1997, North America was introduced to HAWE Hydraulik through its American subsidiary, HAWE Hydraulik USA Inc. (before HAWE North America Inc.). Today, many of America's most rugged industries rely on 70 years of HAWE's dependable German engineering and experience to help them build equipment with perfectly tailored hydraulic systems.

Based in Huntersville, North Carolina, HAWE Hydraulik USA is an ISO 9001:2015 certified international supplier of sophisticated modular hydraulic components and systems. HAWE offers sales and application engineering services for the custom design of modular hydraulic solutions, an extensive local inventory, and aftersales support, including product troubleshooting, and on-site service. Our services also include system design in 2D and 3D-CAD, logistics, product trainings as well as assembly and functional testing. We have additional offices in Portland, Oregon, Bethlehem, Pennsylvania, and Mississauga, Ontario.
