Describe your company culture

Now is a great time to join Nopak, a leader in fluid power located in the Greater Milwaukee Area as our fourth-generation family held business undertakes a significant growth initiative.

Nopak is a fluid power solutions provider like none other. We offer easy access to hydraulic and pneumatic experts, custom designing cylinders, accumulators, and valves to solve our customers' most pressing problems. Throughout our long history as a fourth-generation family-owned company, our dedication to innovation has kept us at the forefront of manufacturing. While other manufacturers have shifted production to cheaper parts and labor, we continue to provide quality products designed and made in America, backed by the friendly service that's embedded in our company culture.
