

**iVT EXPO 2025**  
**August 20–21, 2025**  
**Donald E. Stephens Convention Center | Chicago, USA**

The National Fluid Power Association (NFPA) will again be hosting a hydraulics technology conference at the 2025 [iVT EXPO USA](#) trade show, to be held August 20-21 in Chicago, IL.

iVT EXPO is an annual exposition for the off-highway vehicle design and engineering community, which first took place in the United States in 2022. The event is focused on all types of industrial and off-highway vehicles, with exhibits that are highly focused on a number of key technologies, including new powertrains, electric and hybrid systems, control systems, sensors, and autonomous technologies. With hydraulics serving as a key enabling technology for these vehicles and many of these systems, iVT EXPO offers an ideal platform for growth and expansion of hydraulics, both in its affiliated education program and on its show floor.

NFPA will plan and deliver a two-day conference, running in parallel with the trade show and another education track that will offer iVT EXPO attendees and exhibitors with information on the latest advances in hydraulic technology.

In 2024, iVT EXPO hosted 130+ exhibitors, 45+ speakers and thousands of visitors from around the world. There are already 35 NFPA member companies signed up to exhibit there.

Is your company one? Check the list at: <https://www.ivtexpo.com/usa/en/exhibitor-list.php>

If not – make your plans to exhibit there and secure your space today.
